

CERTIFIED INSTALLER TRAINING CLASS

Learn and Become a Certified Roth Oil Tank Installer

Double Wall Tank Features

- Weld-free galvanized steel outer tank that can hold 110 percent of the primary tank
- Seamless high-density polyethylene inner tank
- Highly visible optical leak alarm
- Up to 50 percent lighter than a 12-gauge steel tank with larger storage capacity
- Non-corrosive steel filling system that provides an even level in each tank when installed in groups
- Burner feeding system with a duplex bushing installed directly into the opening. Available with 3/8" or 1/2" slip-thru compression fittings for copper tubing. Fittings can be removed for a threaded opening of either 3/8" or 1/2".
- Cover for outside use
